PC Tracker Release Check

Version tested: _____ Date: _____

1. Go through the stages in order, on copies of the tracker, never on your live sheet.
2. Tick Works, Problem or Skip for each check. For a Problem, write what you saw under Notes.
3. Done? Tell Claude what failed (the check numbers and your notes), or tick the same checks in the web checklist so Claude can read them.

Before you start

Do these once. Test copies can reach your real Google Contacts and your live sheet.

0.1 One Google account in this browser

☐ Works ☐ Problem ☐ Skip

DO

1. Use a browser window signed in to only your school Google account (a private window where you sign in once works too).

YOU SHOULD SEE

- Only one account shows when you click your picture at the top right of Google Sheets.

Why: Several accounts in one browser can make the 🚀 App Menu slow or missing.

Notes _____

0.2 Phone sync off on every test copy

☐ Works ☐ Problem ☐ Skip

DO

1. On each test copy: ⚙️ Settings → Contacts & sync → turn off "Sync contacts to my phone every night" → Save.
2. Leave it on only on the one copy of your real data in stage 5.

YOU SHOULD SEE

- The switch is off after you open ⚙️ Settings again.

Why: Every copy syncs into the same "School Directory" label in your Google Contacts, the 10 PM rebuild too.

Notes _____

0.3 Bring over only from a copy

☐ Works ☐ Problem ☐ Skip

DO

1. Before stage 3, make a copy of an old tracker (File → Make a copy). Bring over from that copy, never from your live sheet.

YOU SHOULD SEE

- Your live sheet never asks "Keep this tracker paused?".

Why: Bringing a tracker over pauses that tracker's 10 PM rebuild. If it happens to your live sheet: open it and answer No.

Notes _____

1 Put the new version on copies

A copy of your own sheet and the master template.

1.1 A test copy of your own sheet

☐ Works ☐ Problem ☐ Skip

DO

1. Open your live tracker → File → Make a copy. Put "TEST" and the date in its name.
2. Open the copy. When it asks "Is this your MAIN sheet?", answer No: its New Copy Checklist opens.

YOU SHOULD SEE

- The copy has all your data and your 🐞 Debug menu.

Notes

1.2 Paste the new files

☐ Works ☐ Problem ☐ Skip

DO

1. In the copy: Extensions → Apps Script.
2. Follow DEPLOY.md sections 1 and 2: delete the old files it lists, paste every file from Test-Version, keep your z_ files, paste App Scripts (Mine).Json into appsscript.json.
3. Save.

YOU SHOULD SEE

- Saving shows no red error.
- The file list matches the table in DEPLOY.md section 2.

Notes

1.3 The after-pasting steps

☐ Works ☐ Problem ☐ Skip

DO

1. Reload the sheet. Run any menu item and approve the permissions.
2. 🚀 App Menu → 🏗️ Build Sheets Only. Then ⚙️ Settings → Save.
3. 🐞 Debug → 🔧 Fix Dropdown Criteria, then 🐞 Debug → 🎨 Apply Sheet Style.
4. Set the Person Spoke With dropdown by hand (DEPLOY.md section 3, step 9).

YOU SHOULD SEE

- The build sidebar ticks every step.
- Apply Sheet Style ends with its list of things to do by hand.

Notes

1.4 The master template

☐ Works ☐ Problem ☐ Skip

DO

1. Put the same files on the master template, WITHOUT any z_ file, with App Scripts (General).Json as its manifest.
2. Check its Student List header is on row 1 (frozen) and set its Person Spoke With dropdown by hand.

YOU SHOULD SEE

- Extensions → Apps Script on the template shows no file starting with z_.

Notes

2 A brand-new school

A fresh copy of the master template, like a school makes. Keep the test-data files at hand.

2.1 Opening a fresh copy

☐ Works ☐ Problem ☐ Skip

DO

1. Open the template's /copy link (or File → Make a copy of the template) and click Make a copy.
2. Count the seconds until 🚀 App Menu shows at the top.

YOU SHOULD SEE

- Only the 👋 Welcome tab shows, starting with the 6 permissions Google will ask for.
- A note at the bottom right points to 🚀 App Menu → 🚨 Initial Setup.
- The menu shows. The very first open can take up to a minute; if it still isn't there, reload.

Seconds until the menu showed: _____ seconds

Notes

2.2 Typing is blocked before setup

☐ Works ☐ Problem ☐ Skip

DO

1. Type anything in a cell of the Welcome tab and press Enter.

YOU SHOULD SEE

- "🔒 Action Blocked", and your typing is undone.

Notes

2.3 Initial Setup and Google's screens

☐ Works ☐ Problem ☐ Skip

DO

1. 🚀 App Menu → 🚨 Initial Setup (Run Once).
2. Authorization required → OK → pick your account.
3. "Google hasn't verified this app" → Advanced → Go to … (unsafe).
4. Select all → Continue. Count the seconds until the question shows.

YOU SHOULD SEE

- "Setting up your tracker" opens right away, with a spinner.
- Only the Welcome tab shows during and after setup; it now says "You're set up".
- The 🚀 App Menu changes to the getting-started menu.

Seconds until the question showed: _____ seconds

Notes

2.4 "Is this your first PC Tracker?"

☐ Works ☐ Problem ☐ Skip

DO

1. Click "Yes, start fresh".

YOU SHOULD SEE

- "How to download your data" and "Watch the video" are there at once; "See an example tracker" can come a few seconds later.
- The ✅ Getting Started checklist opens on the right.

Notes

2.5 Starting Input Data Mode

☐ Works ☐ Problem ☐ Skip

DO

1. Click "Start Input Data Mode".

YOU SHOULD SEE

- Only the yellow "Student Data" tab shows, with PASTE HERE in A1 and a grey "Closed the side panel?" line.
- The side panel says "Data 1 of 5: Student Data (ATS / Insight)" and which file to pick (its name starts with general_).

Notes

2.6 The side panel comes back

☐ Works ☐ Problem ☐ Skip

DO

1. Close the side panel with its X, then reload the page.

YOU SHOULD SEE

- Input Data Mode comes back by itself, on the same step.

Notes

2.7 Leaving before any build

☐ Works ☐ Problem ☐ Skip

DO

1. In the side panel: Finish or exit → Exit without saving.
2. Then 🚀 App Menu → 📥 Input Data Mode to start it again.

YOU SHOULD SEE

- After the exit you are back on the 👋 Welcome tab, and no other tab shows.

Notes

2.8 Student Data: upload the file

☐ Works ☐ Problem ☐ Skip

DO

1. Upload file → pick "1 - Student Data (ATS).xlsx" from test-data.

YOU SHOULD SEE

- The next step opens with a green box at the top: "Student Data (ATS) completed!" and "18 rows moved to Raw Data. Next: Parent Square."
- The same message shows for a few seconds at the bottom of the sheet.

Notes

2.9 Parent Square: a wrong paste, then the right one

☐ Works ☐ Problem ☐ Skip

DO

1. Open "1 - Student Data (ATS).csv", press Ctrl+A, Ctrl+C, and paste it on the Parent Square Data tab with Ctrl+Shift+V.
2. Then do the same with "2 - Parent Square.csv".

YOU SHOULD SEE

- The wrong paste: a red message says it looks like another export, and the tab empties by itself.
- The right paste: "Parent Square completed!" and "28 rows moved to Raw Data. Next: NYCSA."

Notes

2.10 NYCSA

☐ Works ☐ Problem ☐ Skip

DO

1. Upload "3 - NYCSA (Students with Non-NYCSA Account).xlsx".

YOU SHOULD SEE

- "NYCSA completed!" and "25 rows moved to Raw Data. Next: Site / Class."

Notes

2.11 Site / Class

☐ Works ☐ Problem ☐ Skip

DO

1. Open "4 - Site and Class.csv", copy the three columns with their header and paste them over A1 of the Site / Class tab.
2. Click ✅ Save Site / Class.

YOU SHOULD SEE

- "Site / Class completed!" with the number of classes saved, and "Next: Your Lists."

Notes

2.12 Your Lists builds the sheets first

☐ Works ☐ Problem ☐ Skip

DO

1. Wait on the Your Lists step.

YOU SHOULD SEE

- A spinner shows the build's steps, then "Sheets built, so your lists can find your students."

Notes

2.13 A list with an icon (upload)

☐ Works ☐ Problem ☐ Skip

DO

1. Add another list → name it "Bus Routes" → pick 🚌 → Make the tab & add the list.
2. In its panel: Upload the file → "5a - Your Lists - Bus Routes (student list).xlsx".
3. Go through Columns → Variables → Match (click "Accept the … high-confidence") → View, then Save.

YOU SHOULD SEE

- The new tab is named "🚌 Bus Routes".
- On Match: 10 matched, 6 best guesses with a % (Violet Incredable 96%), 2 not found.

Notes

2.14 A pasted guardian list

☐ Works ☐ Problem ☐ Skip

DO

1. Back to Input Data Mode → Add another list → "PTA".
2. Open "5b - Your Lists - PTA Members (guardian list).csv", copy everything and paste it in the yellow box on the new tab. Go through the steps and Save.

YOU SHOULD SEE

- It is guessed as a guardian list.
- On Match: 11 matched, 1 best guess (Martha K. 84%), 1 not found.

Notes

2.15 Changing a list's icon

☐ Works ☐ Problem ☐ Skip

DO

1. On the Your Lists card, click the 🚌 next to Bus Routes and pick 🎒.
2. Then type any other emoji in "Or type any emoji" and click Use it.

YOU SHOULD SEE

- The tab is renamed each time ("🎒 Bus Routes", then your emoji).
- Letters or numbers in that box are refused with a message.

Notes

2.16 Finishing Input Data Mode

☐ Works ☐ Problem ☐ Skip

DO

1. Click Finish on the Your Lists step.

YOU SHOULD SEE

- The end screen offers "Build sheets now" only if something changed after step 5's build.
- The list tabs are hidden afterwards. Contact Log, Combined Contact Tracking, PCAR and Directory show; the Welcome tab is gone.

Notes

2.17 Save and exit from Site / Class

☐ Works ☐ Problem ☐ Skip

DO

1. 🚀 App Menu → 📥 Input Data Mode → click Site / Class in the bar at the top.
2. Change one teacher's name, then Finish or exit → "Save, exit and build my sheets".

YOU SHOULD SEE

- The note at the bottom says "Site / Class completed" with NO "Next:" part.
- Your tabs come back and the build runs.

Notes

2.18 Next month's data

☐ Works ☐ Problem ☐ Skip

DO

1. 📥 Input Data Mode → upload "1b - Student Data (ATS) - next month (2 new, 1 left).xlsx" → Finish or exit → Save, exit and build.

YOU SHOULD SEE

- The build report shows 2 new students (Steve Rogers, Lucia Lopez) and 1 discharged (Tony Stark).

Notes

2.19 Logging contacts

☐ Works ☐ Problem ☐ Skip

DO

1. In the Contact Log, type a parent's name in the Guardian column of the empty row (try Morticia Addams), then Enter. Log 3 contacts.

YOU SHOULD SEE

- The student, OSIS, date, # and follow-up fill in by themselves.
- Person Spoke With lists only that student's guardians (Morticia and Gomez for an Addams child).
- The Communications box under END shows the new notes.

Notes

2.20 Finishing the Getting Started checklist

☐ Works ☐ Problem ☐ Skip

DO

1. ✅ Getting Started → Finish setup.

YOU SHOULD SEE

- A pop-up says you can always open it from 🚀 App Menu → ✅ Getting Started, and it no longer opens by itself.

Notes

2.21 Mistakes a new user makes

☐ Works ☐ Problem ☐ Skip

DO

1. On a second fresh copy, right after Initial Setup:
2. 🏗️ Build Sheets Only before loading any data. Type on the Welcome tab.
3. In Input Data Mode: Skip on Student Data. On Site / Class with nothing filled in: Save.
4. Open ⚙️ Settings and try Save straight away.

YOU SHOULD SEE

- Build: a note, nothing built. Typing: a "Heads up" warning. Skip: it asks first.
- The empty Site / Class save doesn't erase saved sites. Settings: Save stays grey until "Loading your settings…" goes away.

Notes

3 A returning school

A fresh copy of the (BLANK) template, and a COPY of an old tracker to bring over.

3.1 Choosing the old tracker

☐ Works ☐ Problem ☐ Skip

DO

1. Fresh copy of the template → Initial Setup → "No, bring over last year's tracker".
2. First paste this new tracker's own link and try it. Then pick the COPY of the old tracker from the list.

YOU SHOULD SEE

- Its own link is refused.
- The wizard lists your old trackers.

Notes

3.2 All 6 steps

☐ Works ☐ Problem ☐ Skip

DO

1. Let the wizard run.

YOU SHOULD SEE

- Each step ticks, no "Success!" pop-up comes half way, and the done screen shows.
- The done screen says "One last step: stop the old tracker's nightly rebuild".

Notes

3.3 Everything came over

☐ Works ☐ Problem ☐ Skip

DO

1. Look through the new tracker.

YOU SHOULD SEE

- The Notes tab, the Type list, Send Out, and the events with their delete box and dropdowns.
- Your Lists, with their icons, and the old "Notes" / "Followup Notes" columns.
- Follow-ups translated (Yes is now Followup Needed); a Discharged student still has notes.

Notes

3.4 Person Spoke With after the move

☐ Works ☐ Problem ☐ Skip

DO

1. Open the Person Spoke With dropdown on a few rows.

YOU SHOULD SEE

- Each lists that row's student's guardians.

Notes

3.5 The Import Old Data menu item

☐ Works ☐ Problem ☐ Skip

DO

1. Look in the 🚀 App Menu on a fresh copy before its first build, then after a build.

YOU SHOULD SEE

- 🔄 Import Old Data is there before the first build and gone after it.

Notes

3.6 The old copy pauses itself

☐ Works ☐ Problem ☐ Skip

DO

1. Open the old COPY you brought over from.

YOU SHOULD SEE

- It asks "Keep this tracker paused?". No means it rebuilds again at 10 PM; Yes keeps it paused.

Notes

3.7 End of Year Rollover

☐ Works ☐ Problem ☐ Skip

DO

1. On a test copy: 🚀 App Menu → 🔄 End of Year Rollover, and follow it.

YOU SHOULD SEE

- The archive PDF is named for the school year that ends (in June 2026: 2025-2026).

Notes

4 Your real data, day to day

The TEST copy of your own sheet from stage 1.

4.1 Typing in the Contact Log

☐ Works ☐ Problem ☐ Skip

DO

1. Type a parent's name in the empty row and press Enter. Count the seconds until the student, date and follow-up are filled in.

Seconds until the row filled in: _____ seconds

YOU SHOULD SEE

- It feels as fast as before, or faster.

Notes

4.2 Pasting and deleting rows

☐ Works ☐ Problem ☐ Skip

DO

1. Paste a few rows into the Contact Log, then delete one row.

YOU SHOULD SEE

- The notes in the Communications box follow (the deleted row's note goes away).

Notes

4.3 Deleting row 2

☐ Works ☐ Problem ☐ Skip

DO

1. Delete Contact Log row 2 (right-click its number → Delete row). Wait a few seconds.

YOU SHOULD SEE

- The Person Spoke With dropdowns list names again, on row 2 and further down.

Notes

4.4 Inserting a row above row 2

☐ Works ☐ Problem ☐ Skip

DO

1. Right-click row 2's number → Insert 1 row above. Wait a few seconds.
2. Open the Person Spoke With dropdown on two rows with different students. Then delete the empty row.

YOU SHOULD SEE

- Each row lists ITS OWN student's guardians (not the row above's).

Notes

4.5 Students with 3 guardians

☐ Works ☐ Problem ☐ Skip

DO

1. 👤 Student Overrides → ✨ New / Edit Student: add a third guardian to a student, Save, and let the build run.
2. Log a contact for that student and one for the next student.

YOU SHOULD SEE

- That row lists all 3 guardians; the next row lists only its own.

Notes

4.6 The formula comes back after a build

☐ Works ☐ Problem ☐ Skip

DO

1. Show columns R to AA (the small arrows between Q and AB), clear cell R2, then 🏗️ Build Sheets Only.

YOU SHOULD SEE

- The formula is back in R2 and the columns are hidden again.

Notes

4.7 The lookup box

☐ Works ☐ Problem ☐ Skip

DO

1. Type an OSIS in the OSIS box under END.

YOU SHOULD SEE

- No "are you sure?" warning; the student's details and notes fill in.

Notes

4.8 Your Lists: how it reads

☐ Works ☐ Problem ☐ Skip

DO

1. 📥 Input Data Mode → Your Lists → Edit setup on a list → step 4 View → "One line" and "Bold the names" → Save.
2. Back to Input Data Mode → Finish → Build.

YOU SHOULD SEE

- A phone contact's Additional Information reads like the preview. A list saved before this version reads exactly as it did.

Notes

4.9 Apply Sheet Style: the look

☐ Works ☐ Problem ☐ Skip

DO

1. Look over the tabs after 🎨 Apply Sheet Style (stage 1).

YOU SHOULD SEE

- Montserrat everywhere. Notes and Send Out brown like the Contact Log; Student List, Parents Divided, Directory and Combined navy.
- PCAR's boxes a darker brown with yellow date cells; no "Column 9" on the Student List; the tab is named "Raw Data" with its DATE UPDATED titles at the left.

Notes

4.10 Apply Sheet Style: what follows

☐ Works ☐ Problem ☐ Skip

DO

1. 📆 Events → 📋 New Event. Log a Workshop row in the Contact Log. Type a Type in the Contact Log.
2. Add a Your Lists column and build. Next morning, look again.

YOU SHOULD SEE

- The event has a brown title row; Workshop rows are pale green; the Type keeps its color after the 10 PM run; the list's column has a navy header.

Notes

4.11 Backend New / Edit Student headers

☐ Works ☐ Problem ☐ Skip

DO

1. After a build, show the hidden Backend tab and look at columns G to AV. Hide it again after.

YOU SHOULD SEE

- The headers are on row 2 and students start on row 3.

Notes

4.12 Settings and Build

☐ Works ☐ Problem ☐ Skip

DO

1. ⚙️ Settings → change nothing → Save. Then 🚀 App Menu → 🏗️ Build Sheets Only.

YOU SHOULD SEE

- Settings closes without an error; the build sidebar ticks every step.

Notes

4.13 Opening the sheet

☐ Works ☐ Problem ☐ Skip

DO

1. Close and reopen the sheet 3 times. Count the seconds until the 🚀 App Menu shows.

YOU SHOULD SEE

- The menu shows quickly. A few seconds after opening, the old Contact Log rows hide.

Seconds until the menu showed: _____ seconds

Notes

4.14 Your real exports

☐ Works ☐ Problem ☐ Skip

DO

1. Load this month's real ATS, Parent Square and NYCSA exports with 📥 Input Data Mode (one upload, one paste).

YOU SHOULD SEE

- Each step says "completed!" with sensible row counts; the build report's new and discharged students look right.

Notes

4.15 The next morning

☐ Works ☐ Problem ☐ Skip

DO

1. Open the sheet the morning after. Then Extensions → Apps Script → Executions.

YOU SHOULD SEE

- No "Last night's rebuild didn't finish" note; Last Interaction shows yesterday's contacts.
- nightlyMasterSync ran around 10 PM with no red error.

Notes

---

5 Phone sync

Only the test copy of your real data. Turn phone sync on there for this stage.

5.1 Full Sync while you watch

☐ Works ☐ Problem ☐ Skip

DO

1. ⚙️ Settings → Contacts & sync → turn on "Sync contacts to my phone every night" → Save.
2. 🚀 App Menu → 🧱 Full Sync (Build + Push to Google Contacts). Watch it to the end.

YOU SHOULD SEE

- The bar fills and it ends with a summary.
- The "more than half" question, if it comes at all, comes at the start.

Notes _____

5.2 Contacts on your phone

☐ Works ☐ Problem ☐ Skip

DO

1. Open 3 synced contacts on your phone (one with a Your Lists value).

YOU SHOULD SEE

- Names, phones and emails are right; the notes are newest first; Additional Information shows the list's value.

Notes _____

6 Someone else

Share a test copy with a colleague, or with your own second Google account, as an Editor.

6.1 Another person opens it

☐ Works ☐ Problem ☐ Skip

DO

1. They open the copy and count the seconds until the 🚀 App Menu shows.

YOU SHOULD SEE

- The menus show for them too.

Seconds until the menu showed for them: _____ seconds

Notes _____

6.2 They work in it

☐ Works ☐ Problem ☐ Skip

DO

1. They log a contact and open 📥 Input Data Mode.

YOU SHOULD SEE

- The Contact Log fills in for them, and Input Data Mode opens.

Notes _____

6.3 Still one nightly rebuild

☐ Works ☐ Problem ☐ Skip

DO

1. They open ⚙️ Settings → Save. The next morning, you open Extensions → Apps Script → Executions.

YOU SHOULD SEE

- ONE nightlyMasterSync run around 10 PM, not two.

Notes _____

7 Release copies and links

Your own sheet and the template folder.

7.1 Reset to Display Mode

☐ Works ☐ Problem ☐ Skip

DO

1. Run 🧹 Reset to Display Mode on the master template (type RESET, confirm). Close it and open it again.

YOU SHOULD SEE

- Only the 👋 Welcome tab shows, also after reopening.

Notes

7.2 Make Release Copies

☐ Works ☐ Problem ☐ Skip

DO

1. 🐞 Debug → 📦 Make Release Copies.

YOU SHOULD SEE

- Two copies, "Parent Coordinator Sheet - (EXAMPLE) (date)" and "- (BLANK) (date)", a link each and one version date (it goes in the Version Tracker's column A).

Notes

7.3 The Blank copy's Welcome tab

☐ Works ☐ Problem ☐ Skip

DO

1. Open the BLANK copy.

YOU SHOULD SEE

- "See an example tracker" on its 👋 Welcome tab opens the EXAMPLE copy made in the same run.

Notes

7.4 Template folder and Version Tracker

☐ Works ☐ Problem ☐ Skip

DO

1. Look in the template folder and the Version Tracker.

YOU SHOULD SEE

- Only the newest (BLANK) file in the folder (old (MIGRATE) files in a subfolder).
- Headers D "Blank Copy", E "Example", F "Document"; D in the newest row = the BLANK file's /copy link.

Notes

7.5 My Links

☐ Works ☐ Problem ☐ Skip

DO

1. 🐞 Debug → 🔗 My Links. Then 📖 Open User Guide.

YOU SHOULD SEE

- Every link from the 📌 YOUR LINKS box, and "Version Tracker, column D/E/F" with each link.
- "See an example tracker" shows in 📖 Open User Guide.

Notes

7.6 The User Guide Doc

☐ Works ☐ Problem ☐ Skip

DO

1. Ask Claude for the list of what changed in docs/USER_GUIDE.md, and make those changes in the Google Doc.

YOU SHOULD SEE

- The Google Doc matches this version.

Notes

8 Before it goes to schools

Last steps, in this order.

8.1 Problems fixed

☐ Works ☐ Problem ☐ Skip

DO

1. Give Claude your report (or say "release check done": Claude can read your answers here). Re-test what gets fixed.

YOU SHOULD SEE

- No check is left at Problem.

Notes

8.2 Final check with Claude

☐ Works ☐ Problem ☐ Skip

DO

1. Ask Claude for the final check: tests, the file list in DEPLOY.md, no z_ files in the template, the Version Tracker row.

YOU SHOULD SEE

- Claude reports everything in order.

Notes

8.3 Pilot

☐ Works ☐ Problem ☐ Skip

DO

1. Give it to 1 or 2 friendly schools for a week or two.

YOU SHOULD SEE

- Nothing they report is left unfixed.

Notes

8.4 Clean up the test copies

☐ Works ☐ Problem ☐ Skip

DO

1. On each test copy: ⚙️ Settings → Live updates → Rebuild sheets → "Only when I click Build", phone sync off, Save. Then move it to the trash.

YOU SHOULD SEE

- No test copy rebuilds or syncs at night any more.

Notes

8.5 Going live

☐ Works ☐ Problem ☐ Skip

DO

1. DEPLOY.md section 5: merge Test-Version into main, update the master template, add the Version Tracker row.

YOU SHOULD SEE

- Schools get "New Version Available".

Notes
