PC Tracker Release Check

Version tested: _____ Date: _____

1. Four parts, in order: 1 set up the test copies, 2 test with fake data (the main test), 3 a short check with your real data, 4 release the new version. Your live sheet is only touched in part 4.
2. Do the 48 essentials before any school gets this version. The checks marked OPTIONAL can wait.
3. Tick Works, Problem or Skip for each check. For a Problem, write what you saw under Notes.
4. Done? Tell Claude what failed (the check numbers and your notes), or tick the same checks in the web checklist so Claude can read them.

PART 1 OF 4

Set up for testing

Make the test copies. Your live sheet is never touched.

Before you start

Four rules for every test copy.

0.1 **One Google account in this browser** ☐ Works ☐ Problem ☐ Skip

DO

1. Use a browser window signed in to only your school Google account (a private window where you sign in once works too).

YOU SHOULD SEE

- Only one account shows when you click your picture at the top right of Google Sheets.

Why: Several accounts in one browser can make the 🚀 App Menu slow or missing.

Notes _____

0.2 **Phone sync stays off on test copies** ☐ Works ☐ Problem ☐ Skip

DO

1. Never turn on ⚙️ Settings → Contacts & sync → "Sync contacts to my phone every night" on a test copy. Stage 6 is the one exception, from a second Google account.
2. A new copy starts with it off, so there is nothing to turn off: just look once after each copy's Initial Setup.

YOU SHOULD SEE

- The switch is off when you open ⚙️ Settings on a test copy.

Why: A test copy with it on would put its families into the "School Directory" label of YOUR Google Contacts every night at 10 PM. Before this version a copy took the switch from the sheet it was copied from.

Notes _____

0.3 Never bring over from your live sheet

☐ Works ☐ Problem ☐ Skip

DO

1. When a test asks you to bring over last year's tracker, pick a test copy, never your live sheet.

YOU SHOULD SEE

- Your live sheet never asks "Keep this tracker paused?".

Why: Bringing a tracker over pauses that tracker's 10 PM rebuild. If it happens to your live sheet: open it and answer No.

Notes

0.4 The test files

☐ Works ☐ Problem ☐ Skip

DO

1. Download "PC Tracker test data.zip" from the test-data folder on GitHub and unzip it.

YOU SHOULD SEE

- A folder with 1 - Student Data (ATS), 2 - Parent Square, 3 - NYCSA, 4 - Site and Class and four 5 - Your Lists files.

Notes

1 Make the test copies

A TEST master (a copy of your sheet with the new version). Then 📦 Make Release Copies on it makes the other two: its Example is your fake-data copy, its Blank your test template.

1.1 The TEST master

☐ Works ☐ Problem ☐ Skip

DO

1. Open your live tracker → File → Make a copy. Name it "TEST master" and the date.
2. Open it. When it asks "Is this your MAIN sheet?", answer No, and close the New Copy Checklist.

YOU SHOULD SEE

- It has all your data and your 🐞 Debug menu.

Notes

1.2 The new version on the TEST master

☐ Works ☐ Problem ☐ Skip

DO

1. In the TEST master: Extensions → Apps Script.
2. Follow DEPLOY.md sections 1 and 2: delete the old files it lists, paste every file from Test-Version, keep your z_ files, paste App Scripts (Mine).Json into appsscript.json. Save.

YOU SHOULD SEE

- Saving shows no red error.
- The file list matches the table in DEPLOY.md section 2.

Notes

1.3 Setting up the TEST master

☐ Works ☐ Problem ☐ Skip

DO

1. Reload. 🚀 App Menu → 🚨 Initial Setup (a copy asks again) → approve the permissions → close the question window.
2. Open ⚙️ Settings and look: phone sync is off (a new copy starts with it off). Close it. Then 🚀 App Menu → 🏗️ Build Sheets Only.
3. 🐞 Debug → 🔧 Fix Dropdown Criteria, then 🐞 Debug → 🎨 Apply Sheet Style.
4. Set the Person Spoke With dropdown by hand (DEPLOY.md section 3, step 9).

YOU SHOULD SEE

- Phone sync was already off, without you changing it.
- The build sidebar ticks every step.
- Apply Sheet Style ends with its list of things to do by hand.

Notes

1.4 The fake-data copy and the test template, in one go

☐ Works ☐ Problem ☐ Skip

DO

1. On the TEST master (never your live sheet): 🐞 Debug → 📦 Make Release Copies (Example + Blank) → Make the 2 copies. When it's done, ignore what it says to do next (Version Tracker, sharing, template folder): these are only test copies.
2. Rename the Example "TEST fake-data copy" and the Blank "TEST template" (File → Rename), so they can't be mixed up with the real release copies in part 4.
3. Open the TEST fake-data copy. Answer No to "Is this your MAIN sheet?". Extensions → Apps Script: delete every file starting with z_ and paste App Scripts (General).Json into appsscript.json. Save. Now it acts like a school's sheet.
4. Reload → 🚀 App Menu → 🚨 Initial Setup → approve → close the question window. Look in ⚙️ Settings: phone sync is off.

YOU SHOULD SEE

- Both copies are made, each with a link, in the TEST master's folder.
- The fake-data copy has the fake students (Simpsons, Addams, Belchers…), 26 Contact Log rows, 3 events and 5 Notes, and no 🐞 Debug menu.

Why: A copy gets the code of the sheet it is made from, and your live sheet still has the old version. Part 4 runs this same menu item on your live sheet, so this also tests it.

Notes

1.5 The test template

☐ Works ☐ Problem ☐ Skip

DO

1. Open the TEST template. Answer No to the MAIN question, delete every z_ file, paste App Scripts (General).Json. Save. Don't run Initial Setup on it.
2. For every new-school test, make a copy of it (File → Make a copy): that copy is what a school gets.

YOU SHOULD SEE

- Only the 👋 Welcome tab shows, and its "See an example tracker" opens the TEST fake-data copy.
- Extensions → Apps Script shows no file starting with z_.

Notes

PART 2 OF 4

Test with fake data

The main test. Fake students and fake exports, so nothing real can be hurt and every answer is known.

2 A brand-new school

A copy of the test template, and the test files.

2.1 Opening a fresh copy

☐ Works ☐ Problem ☐ Skip

DO

1. Open the test template → File → Make a copy → open the copy.
2. Count the seconds until 🚀 App Menu shows at the top.

YOU SHOULD SEE

- Only the 👋 Welcome tab shows, starting with the 6 permissions Google will ask for.
- A note at the bottom right points to 🚀 App Menu → 🚨 Initial Setup.
- The menu shows. The very first open can take up to a minute; if it still isn't there, reload.

Seconds until the menu showed: _____ seconds

Notes

2.2 Typing is blocked before setup OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Type anything in a cell of the Welcome tab and press Enter.

YOU SHOULD SEE

- "🔒 Action Blocked", and your typing is undone.

Notes

2.3 Initial Setup and Google's screens

☐ Works ☐ Problem ☐ Skip

DO

1. 🚀 App Menu → 🚨 Initial Setup (Run Once).
2. Authorization required → OK → pick your account.
3. "Google hasn't verified this app" → Advanced → Go to … (unsafe).
4. Select all → Continue. Count the seconds until the question shows.

YOU SHOULD SEE

- "Setting up your tracker" opens right away, with a spinner.
- Only the Welcome tab shows during and after setup; it now says "You're set up".
- The 🚀 App Menu changes to the getting-started menu.

Seconds until the question showed: _____ seconds

Notes

2.4 "Is this your first PC Tracker?"

☐ Works ☐ Problem ☐ Skip

DO

1. Click "Yes, start fresh".

YOU SHOULD SEE

- "How to download your data" and "Watch the video" are there at once; "See an example tracker" can come a few seconds later.
- The ✅ Getting Started checklist opens on the right.

Notes

2.5 Starting Input Data Mode

☐ Works ☐ Problem ☐ Skip

DO

1. Click "Start Input Data Mode".

YOU SHOULD SEE

- Only the yellow "Student Data" tab shows, with PASTE HERE in A1 and a grey "Closed the side panel?" line.
- The side panel says "Data 1 of 5: Student Data (ATS / Insight)" and which file to pick (its name starts with general_).

Notes

2.6 The side panel comes back OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Close the side panel with its X, then reload the page.

YOU SHOULD SEE

- Input Data Mode comes back by itself, on the same step.

Notes

2.7 Leaving before any build OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. In the side panel: Finish or exit → Exit without saving.
2. Then 🚀 App Menu → 📥 Input Data Mode to start it again.

YOU SHOULD SEE

- After the exit you are back on the 👋 Welcome tab, and no other tab shows.

Notes

2.8 Student Data: upload the file

☐ Works ☐ Problem ☐ Skip

DO

1. Upload file → pick "1 - Student Data (ATS).xlsx" from the test files.

YOU SHOULD SEE

- The next step opens with a green box at the top: "Student Data (ATS) completed!" and "18 rows moved to Raw Data. Next: Parent Square."
- The same message shows for a few seconds at the bottom of the sheet.

Notes

2.9 Parent Square: a wrong paste, then the right one

☐ Works ☐ Problem ☐ Skip

DO

1. Open "1 - Student Data (ATS).csv", press Ctrl+A, Ctrl+C, and paste it on the Parent Square Data tab with Ctrl+Shift+V.
2. Then do the same with "2 - Parent Square.csv".

YOU SHOULD SEE

- The wrong paste: a red message says it looks like another export, and the tab empties by itself.
- The right paste: "Parent Square completed!" and "28 rows moved to Raw Data. Next: NYCSA."

Notes

2.10 NYCSA

☐ Works ☐ Problem ☐ Skip

DO

1. Upload "3 - NYCSA (Students with Non-NYCSA Account).xlsx".

YOU SHOULD SEE

- "NYCSA completed!" and "25 rows moved to Raw Data. Next: Site / Class."

Notes

2.11 Site / Class

☐ Works ☐ Problem ☐ Skip

DO

1. Open "4 - Site and Class.csv", copy the three columns with their header and paste them over A1 of the Site / Class tab.
2. Click ✅ Save Site / Class.

YOU SHOULD SEE

- "Site / Class completed!" with the number of classes saved, and "Next: Your Lists."

Notes

2.12 Your Lists builds the sheets first

☐ Works ☐ Problem ☐ Skip

DO

1. Wait on the Your Lists step.

YOU SHOULD SEE

- A spinner shows the build's steps, then "Sheets built, so your lists can find your students."

Notes

2.13 A list with an icon (upload)

☐ Works ☐ Problem ☐ Skip

DO

1. Add another list → name it "Bus Routes" → pick 🚌 → Make the tab & add the list.
2. In its panel: Upload the file → "5a - Your Lists - Bus Routes (student list).xlsx".
3. Go through Columns → Variables → Match (click "Accept the … high-confidence") → View, then Save.

YOU SHOULD SEE

- The new tab is named "🚌 Bus Routes".
- On Match: 10 matched, 6 best guesses with a % (Violet Incredable 96%), 2 not found.

Notes

2.14 A pasted guardian list OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Back to Input Data Mode → Add another list → "PTA".
2. Open "5b - Your Lists - PTA Members (guardian list).csv", copy everything and paste it in the yellow box on the new tab. Go through the steps and Save.

YOU SHOULD SEE

- It is guessed as a guardian list.
- On Match: 11 matched, 1 best guess (Martha K. 84%), 1 not found.

Notes

2.15 Changing a list's icon OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. On the Your Lists card, click the 🚌 next to Bus Routes and pick 🎒.
2. Then type any other emoji in "Or type any emoji" and click Use it.

YOU SHOULD SEE

- The tab is renamed each time ("🎒 Bus Routes", then your emoji).
- Letters or numbers in that box are refused with a message.

Notes

2.16 Finishing Input Data Mode

☐ Works ☐ Problem ☐ Skip

DO

1. Click Finish on the Your Lists step.

YOU SHOULD SEE

- The end screen offers "Build sheets now" only if something changed after step 5's build.
- The list tabs are hidden afterwards. Contact Log, Combined Contact Tracking, PCAR and Directory show; the Welcome tab is gone.

Notes

2.17 Save and exit from Site / Class OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 🚀 App Menu → 📥 Input Data Mode → click Site / Class in the bar at the top.
2. Change one teacher's name, then Finish or exit → "Save, exit and build my sheets".

YOU SHOULD SEE

- The note at the bottom says "Site / Class completed" with NO "Next:" part.
- Your tabs come back and the build runs.

Notes

2.18 Next month's data OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 📥 Input Data Mode → upload "1b - Student Data (ATS) - next month (2 new, 1 left).xlsx" → Finish or exit → Save, exit and build.

YOU SHOULD SEE

- The build report shows 2 new students (Steve Rogers, Lucia Lopez) and 1 discharged (Tony Stark).

Notes

2.19 Logging contacts

☐ Works ☐ Problem ☐ Skip

DO

1. In the Contact Log, type a parent's name in the Guardian column of the empty row (try Morticia Addams), then Enter. Log 3 contacts.

YOU SHOULD SEE

- The student, OSIS, date, # and follow-up fill in by themselves.
- Person Spoke With lists only that student's guardians (Morticia and Gomez for an Addams child).
- The Communications box under END shows the new notes.

Notes

2.20 Finishing the Getting Started checklist OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. ✅ Getting Started → Finish setup.

YOU SHOULD SEE

- A pop-up says you can always open it from 🚀 App Menu → ✅ Getting Started, and it no longer opens by itself.

Notes

2.21 Mistakes a new user makes OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. On a second copy of the test template, right after Initial Setup:
2. 🏗️ Build Sheets Only before loading any data. Type on the Welcome tab.
3. In Input Data Mode: Skip on Student Data. On Site / Class with nothing filled in: Save.
4. Open ⚙️ Settings and try Save straight away.

YOU SHOULD SEE

- Build: a note, nothing built. Typing: a "Heads up" warning. Skip: it asks first.
- The empty Site / Class save doesn't erase saved sites. Settings: Save stays grey until "Loading your settings…" goes away.

Notes

3 A returning school

A copy of the test template brings over "last year's tracker": a copy of your fake-data copy.

3.1 Last year's tracker, for the test

☐ Works ☐ Problem ☐ Skip

DO

1. Open your TEST fake-data copy → File → Make a copy. Name it "PC Tracker - Last year (test)" ("PC Tracker" in the name puts it in the wizard's list).
2. Open it → 🚀 App Menu → 🚨 Initial Setup → approve → close the question window. Look in ⚙️ Settings: phone sync is off.
3. 📥 Input Data Mode → upload "1b - Student Data (ATS) - next month (2 new, 1 left).xlsx" → Finish or exit → Save, exit and build.

YOU SHOULD SEE

- It has the fake data, and the build report shows Tony Stark discharged.
- It plays last year's tracker, so your fake-data copy stays as it is for stage 4.

Notes

3.2 Choosing the old tracker

☐ Works ☐ Problem ☐ Skip

DO

1. Make a new copy of the test template → Initial Setup → "No, bring over last year's tracker".
2. First paste this new tracker's own link and try it. Then pick "PC Tracker - Last year (test)" from the list. Never your live sheet: it can be in the list too.

YOU SHOULD SEE

- Its own link is refused.
- The wizard lists your trackers, "PC Tracker - Last year (test)" among them.

Notes

3.3 All 6 steps

☐ Works ☐ Problem ☐ Skip

DO

1. Let the wizard run.

YOU SHOULD SEE

- Each step ticks, no "Success!" pop-up comes half way, and the done screen shows.
- The done screen says "One last step: stop the old tracker's nightly rebuild".

Notes

3.4 Everything came over

☐ Works ☐ Problem ☐ Skip

DO

1. Look through the new tracker.

YOU SHOULD SEE

- The Contact Log rows, the Notes tab, the Type list, Send Out, and the 3 events with their delete box and dropdowns.
- The New / Edit Student changes (Tina Belcher, Peter Parker), and Your Lists with their icons if you added any.
- Tony Stark is still on the Student List, as Discharged.

Notes _____

3.5 Person Spoke With after the move

☐ Works ☐ Problem ☐ Skip

DO

1. Open the Person Spoke With dropdown on a few rows.

YOU SHOULD SEE

- Each lists that row's student's guardians.

Notes _____

3.6 The Import Old Data menu item OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Look in the 🚀 App Menu on a new copy before its first build, then on the tracker you just brought over.

YOU SHOULD SEE

- 🔄 Import Old Data is there before the first build and gone after it.

Notes _____

3.7 The old tracker pauses itself

☐ Works ☐ Problem ☐ Skip

DO

1. Open "PC Tracker - Last year (test)" again.

YOU SHOULD SEE

- It asks "Keep this tracker paused?". No means it rebuilds again at 10 PM; Yes keeps it paused.

Notes _____

3.8 End of Year Rollover OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. On "PC Tracker - Last year (test)": 🚀 App Menu → 🔄 End of Year Rollover, and follow it.

YOU SHOULD SEE

- The archive PDF is named for the school year that ends (in June 2026: 2025-2026).

Notes _____

4 Day to day

Your fake-data copy.

4.1 Typing in the Contact Log

☐ Works ☐ Problem ☐ Skip

DO

1. Type a fake parent's name (Marge Simpson) in the Guardian column of the empty row and press Enter. Count the seconds until the row is filled in.

YOU SHOULD SEE

- The student, OSIS, date, # and follow-up fill in by themselves.

Seconds until the row filled in: _____ seconds

Notes _____

4.2 Pasting and deleting rows OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Paste a few rows into the Contact Log, then delete one row.

YOU SHOULD SEE

- The notes in the Communications box follow (the deleted row's note goes away).

Notes

4.3 Deleting row 2

☐ Works ☐ Problem ☐ Skip

DO

1. Delete Contact Log row 2 (right-click its number → Delete row). Wait a few seconds.

YOU SHOULD SEE

- The Person Spoke With dropdowns list names again, on row 2 and further down.

Notes

4.4 Inserting a row above row 2

☐ Works ☐ Problem ☐ Skip

DO

1. Right-click row 2's number → Insert 1 row above. Wait a few seconds.
2. Open the Person Spoke With dropdown on two rows with different students. Then delete the empty row.

YOU SHOULD SEE

- Each row lists ITS OWN student's guardians (not the row above's).

Notes

4.5 A student with 3 guardians OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 👤 Student Overrides → ✨ New / Edit Student: add a third guardian to Wednesday Addams, Save, and let the build run.
2. Log a contact for Wednesday and one for another student.

YOU SHOULD SEE

- Wednesday's row lists all 3 guardians; the other row lists only its own.

Notes

4.6 The formula comes back after a build OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Show columns R to AA (the small arrows between Q and AB), clear cell R2, then 🏗️ Build Sheets Only.

YOU SHOULD SEE

- The formula is back in R2 and the columns are hidden again.

Notes

4.7 The lookup box OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Copy an OSIS from the Student List and type it in the OSIS box under END.

YOU SHOULD SEE

- No "are you sure?" warning; the student's details and notes fill in.

Notes

4.8 Your Lists: how it reads OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 📥 Input Data Mode → click Your Lists in the bar at the top → Add another list → upload "5c - Your Lists - Field Trip Forms".
2. Step 2 Variables: keep the form column, shown in Additional Information and as a Student List column.
3. Step 4 View: "One line" and "Bold the names" → Save → Back to Input Data Mode → Finish → Build sheets now.

YOU SHOULD SEE

- Phone Contacts' notes show "Additional Information" reading like the preview.
- The Student List has the list's column, with a navy header.

Notes

4.9 The sheet's look OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Look over the tabs (the look came from 🎨 Apply Sheet Style on the TEST master).

YOU SHOULD SEE

- Montserrat everywhere. Notes and Send Out brown like the Contact Log; Student List, Parents Divided, Directory and Combined navy.
- PCAR's boxes a darker brown with yellow date cells; no "Column 9" on the Student List; the tab is named "Raw Data" with its DATE UPDATED titles at the left.

Notes

4.10 Events and colors OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 📆 Events → 📋 New Event and add a parent. Log a Workshop row in the Contact Log, and type a Type in it.

YOU SHOULD SEE

- The event has a brown title row and its dropdowns work; the Workshop row is pale green; the Type gets its color.

Notes

4.11 Backend New / Edit Student headers OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Show the hidden Backend tab and look at columns G to AV. Hide it again after.

YOU SHOULD SEE

- The headers are on row 2 and students start on row 3.

Notes

4.12 Settings and Build

☐ Works ☐ Problem ☐ Skip

DO

1. ⚙️ Settings → change nothing → Save. Then 🚀 App Menu → 🏗️ Build Sheets Only.

YOU SHOULD SEE

- Settings closes without an error; the build sidebar ticks every step.

Notes

4.13 The next morning

☐ Works ☐ Problem ☐ Skip

DO

1. Open the fake-data copy the morning after. Then Extensions → Apps Script → Executions.

YOU SHOULD SEE

- No "Last night's rebuild didn't finish" note; Last Interaction shows yesterday's contacts; the Type from 4.10 kept its color.
- nightlyMasterSync ran around 10 PM with no red error.

Notes _____

5 Someone else

Share your fake-data copy with a colleague, or with your own second Google account, as an Editor. **All optional.**

5.1 Another person opens it OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. They open the copy and count the seconds until the 🚀 App Menu shows.

Seconds until the menu showed for them: _____ seconds

YOU SHOULD SEE

- The menus show for them too.

Notes _____

5.2 They work in it OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. They log a contact and open 📥 Input Data Mode.

YOU SHOULD SEE

- The Contact Log fills in for them, and Input Data Mode opens.

Notes _____

5.3 Still one nightly rebuild OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. They open ⚙️ Settings → Save. The next morning, you open Extensions → Apps Script → Executions.

YOU SHOULD SEE

- ONE nightlyMasterSync run around 10 PM, not two.

Notes _____

6 Phone sync

Only from a SECOND Google account (a free Gmail account works), so the fake families land in that account's contacts, not yours.

6.1 A copy of its own

☐ Works ☐ Problem ☐ Skip

DO

1. Share your fake-data copy with the second account as an Editor (Share → its email). In a browser signed in to that account: open it → File → Make a copy.
2. In that copy: 🚀 App Menu → 🚨 Initial Setup → approve.

YOU SHOULD SEE

- The copy belongs to the second account (its name shows in that account's Drive).

Notes _____

6.2 Full Sync while you watch

☐ Works ☐ Problem ☐ Skip

DO

1. ⚙️ Settings → Contacts & sync → turn on "Sync contacts to my phone every night" → Save.
2. 🚀 App Menu → 🧱 Full Sync (Build + Push to Google Contacts). Watch it to the end.

YOU SHOULD SEE

- The bar fills and it ends with a summary.
- The "more than half" question, if it comes at all, comes at the start.

Notes

6.3 The contacts

☐ Works ☐ Problem ☐ Skip

DO

1. Open contacts.google.com in that account → the "School Directory" label. Then move that copy to the trash (a tracker in the trash skips its nightly job).

YOU SHOULD SEE

- The fake families with their phones and emails; the notes newest first; "Additional Information" from a list if the copy had one.

Notes

PART 3 OF 4

A short check with your real data

Fake data is small. These few checks show speed and this month's real exports.

7 Your real data

The TEST master: your real data with the new version. Leave phone sync off on it.

7.1 Typing at real size

☐ Works ☐ Problem ☐ Skip

DO

1. Type a real parent's name in the Contact Log's empty row and press Enter. Count the seconds until the row is filled in.

Seconds until the row filled in: _____ seconds

Notes

YOU SHOULD SEE

- As fast as on your live sheet, or faster.

7.2 Opening at real size

☐ Works ☐ Problem ☐ Skip

DO

1. Close and reopen the TEST master 3 times. Count the seconds until the 🚀 App Menu shows.

Seconds until the menu showed: _____ seconds

Notes

YOU SHOULD SEE

- The menu shows quickly. A few seconds after opening, the old Contact Log rows hide.

7.3 Row 2 at real size OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Delete Contact Log row 2, wait a few seconds. Then insert a row above row 2, wait, and delete it again.

Notes

YOU SHOULD SEE

- Each row's Person Spoke With dropdown lists its own student's guardians after each change.

7.4 This month's real exports

☐ Works ☐ Problem ☐ Skip

DO

1. 📥 Input Data Mode: load your real ATS, Parent Square and NYCSA exports (one upload, one paste). Finish → Build.

Notes

YOU SHOULD SEE

- Each step says "completed!" with sensible row counts; the build report's new and discharged students look right.

7.5 Your own lists OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. If your sheet has Your Lists lists: after the build, look at a few phone contacts' Additional Information.

Notes

YOU SHOULD SEE

- Your lists read exactly as they did before this version.

7.6 The next morning

☐ Works ☐ Problem ☐ Skip

DO

1. Open the TEST master the morning after. Then Extensions → Apps Script → Executions.

YOU SHOULD SEE

- No "Last night's rebuild didn't finish" note; nightlyMasterSync ran around 10 PM with no red error.

Notes

PART 4 OF 4

Release the new version

Once the tests pass: your sheet, the release copies, a pilot, then every school.

8 Release it

In this order, once the tests pass.

8.1 Problems fixed

☐ Works ☐ Problem ☐ Skip

DO

1. Tell Claude "release check done" (Claude reads your answers here) or give the report. Re-test each check that gets a fix.

YOU SHOULD SEE

- No check is left at Problem.

Notes

8.2 Final check with Claude

☐ Works ☐ Problem ☐ Skip

DO

1. Ask Claude for the final check: the tests, the file list in DEPLOY.md, what to paste where.

YOU SHOULD SEE

- Claude reports everything in order.

Notes

8.3 Your live sheet

☐ Works ☐ Problem ☐ Skip

DO

1. Put the new version on your live tracker: DEPLOY.md sections 1 to 3 (as you did on the TEST master).

YOU SHOULD SEE

- It opens, builds and logs a contact as the TEST master did.

Notes

8.4 Release copies

☐ Works ☐ Problem ☐ Skip

DO

1. On your live sheet: 🐞 Debug → 📦 Make Release Copies (Example + Blank).

YOU SHOULD SEE

- Two copies, "Parent Coordinator Sheet - (EXAMPLE) (date)" and "- (BLANK) (date)", a link each and one version date (it goes in the Version Tracker's column A).

Notes

8.5 The Blank copy becomes the template

☐ Works ☐ Problem ☐ Skip

DO

1. Open the BLANK copy: delete every file starting with z_ and paste App Scripts (General).Json (its New Copy Checklist says so).

YOU SHOULD SEE

- Only the 👋 Welcome tab shows; "See an example tracker" on it opens the EXAMPLE copy made in the same run.

Notes

8.6 The template folder

☐ Works ☐ Problem ☐ Skip

DO

1. Put the BLANK copy in the template folder; move older (BLANK) and (MIGRATE) files to a subfolder.

YOU SHOULD SEE

- Only the newest (BLANK) file is in the folder itself.

Notes

8.7 Pilot

☐ Works ☐ Problem ☐ Skip

DO

1. Give 1 or 2 friendly schools the BLANK copy's /copy link and let them use it for a week or two.

YOU SHOULD SEE

- Nothing they report is left unfixed.

Notes

8.8 The Version Tracker row

☐ Works ☐ Problem ☐ Skip

DO

1. Add a row: A = the version date, D "Blank Copy" = the BLANK's /copy link, E "Example" = the EXAMPLE's link, F "Document" = the User Guide (when it changed).

YOU SHOULD SEE

- Every school's tracker now offers "New Version Available".

Notes

8.9 Links OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. 🐞 Debug → 🔗 My Links. Then 📖 Open User Guide.

YOU SHOULD SEE

- Every link from the 📌 YOUR LINKS box, and "Version Tracker, column D/E/F" with each link.
- "See an example tracker" shows in 📖 Open User Guide.

Notes

8.10 The User Guide Doc OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Ask Claude for the list of what changed in docs/USER_GUIDE.md, and make those changes in the Google Doc.

YOU SHOULD SEE

- The Google Doc matches this version.

Notes

8.11 Merge into main OPTIONAL

☐ Works ☐ Problem ☐ Skip

DO

1. Ask Claude to merge Test-Version into main.

YOU SHOULD SEE

- main is the version schools have.

Notes

8.12 Clean up the test copies

☐ Works ☐ Problem ☐ Skip

DO

1. Move each test copy to the trash: the TEST master, the TEST fake-data copy, "PC Tracker - Last year (test)", the TEST template and the copies made from it.

YOU SHOULD SEE

- Nothing else to do: a tracker in the trash skips its 10 PM rebuild by itself.

Why: Every copy that ran Initial Setup has its own 10 PM rebuild under your account, and Google can keep running a trashed sheet's script until the trash is emptied. This version checks for the trash, so trashing is enough.
